Projects

Project Name: Tasteful Twist

GitHub Repo : [Tasteful Twist](#)

Deployed Link : [Tasteful Twist](#)

- **Summary:** Tasteful Twist is a web application for discovering and sharing unique recipes with a personalized touch.
- **Responsibilities:** The primary responsibility is developing user profiles, enabling signup/login functionalities, integrating Email JS for contact buttons, and implementing a subscription feature for preferred cuisine and frequency choices. This involves crafting secure authentication systems, designing user interfaces, and managing subscription data. Utilizing HTML, CSS, JavaScript, the project facilitates user interactions by allowing profile creation, seamless communication via Email JS, and personalized subscriptions for cuisine preferences and email frequencies.
- **Tools/Languages Used:** HTML5, CSS3, JS, Bootstrap5, Email JS for contact information handling, GitHub for version control, Netlify for deployment.
